Tentative Decision to Approve the Clean Closure Equivalency Demonstration
EPA I.D. #KYD 068 332 147
Agency Interest #2301**

The Kentucky Environmental and Public Protection Cabinet (The Cabinet), Division of Waste Management (Division), has tentatively decided to approve the Clean Closure Equivalency Demonstration for the Sargent & Greenleaf, Inc. (Sargent & Greenleaf) company. The closed unit was formerly a surface impoundment. Sargent & Greenleaf is located at One Security Drive, Nicholasville, Kentucky. The site contact is Mr. Don Wayne, who may be reached at (859) 885-9411.

What is a Clean Closure Equivalency Demonstration?

A Clean Closure Equivalency Demonstration consists of a compilation of information gathered to demonstrate that a hazardous waste treatment, storage or disposal unit was closed to satisfactory environmental standards. This information includes details regarding how wastes were disposed of and/or treated and analysis of soil and groundwater samples to confirm that any constituents present in the soil and groundwater are below levels that represent a potential health and/or environmental concern. Sargent & Greenleaf operated an impoundment that held electroplating wastewaters until 1983. After the impoundment was drained, sludges were excavated and properly disposed of while the residual soils and sediment were solidified. Samples of soil beneath and around the perimeter of the former impoundment yielded no hazardous constituents above allowable concentrations. Groundwater samples collected from downgradient of the unit also contained no hazardous constituents above drinking water standards.
